

Final Project

Specifications:

1. Select from any of the following topics to create a micro / experience site.
 - a. Movie Website
 - b. Musician / Band Website
 - c. Video Game Website
2. The specific subjects may be real world (i.e. a real movie) or fictional (i.e. an original concept)
3. All of these sites must incorporate the following:
 - a. Images (i.e. image gallery, wallpaper/desktop downloads, icons, etc.)
 - b. Video (i.e. trailers)
 - c. Demonstrate a simple updateable backend (i.e. changing a page's textual info or images via xml)
4. You will be assigned a partner. They will provide you feedback, be a usability tester and overall critic/reviewer. Part of their grade will be determined by your performance. (20%).
5. This project MUST be delivered online on a domain.
6. These projects will be reviewed not only by myself but a number of designers/developers.

Criteria:

1. Visual and UI Design (40%)
 - Concept, execution and impact
 - Appropriateness to the subject matter
 - Color, Typography, Layout, Usability
2. Technical Performance and Innovation (40%)
 - Performance and load time
 - Lack of errors/bugs
 - Uniqueness of interface and delivery
3. Peer Review Performance (20%)
